

QUALITY-BUILT TO LAST.®

Premium Hub Assemblies

MPA Hub Assemblies are designed, manufactured, and durability tested to exceed OE manufacturer specifications for fit and function.

- Precision Raceway Induction Hardening
- Precision Hardened and Machined Bearings
- OE Grade ABS Sensors and Cable Sheathing*
- Premium Grade Steel Wheel and Mounting Studs*
- Premium Quality Seals and Grease

98%+ VIO Coverage

1145 Hub Assembly SKU's

QUALITY-BUILT™

HUBS AND BEARINGS | BUJES Y RODAMIENTOS | MOYEUX ET ROULEMENTS

Quality-Built Hub Assemblies are built to exacting specifications and use only premium materials, so they can handle the demands put on them by today's vehicles.

1. Application-Specific

OE designs and materials provide like-new performance and durability for miles to come.

2. Heavy Duty Seals

Protect internal bearings and components from water, dust, and external debris.

3. Smooth Operation

High-temperature, aerospace grade grease reduces friction and eliminates noise.

4. Raceways

Induction hardened, micro-finished races improve bearing durability and load capacity.

5. Precision Component Matching

Prevents excessive run out, improves internal tolerance accuracy, and improves load bearing capacity.

6. Wheel Studs

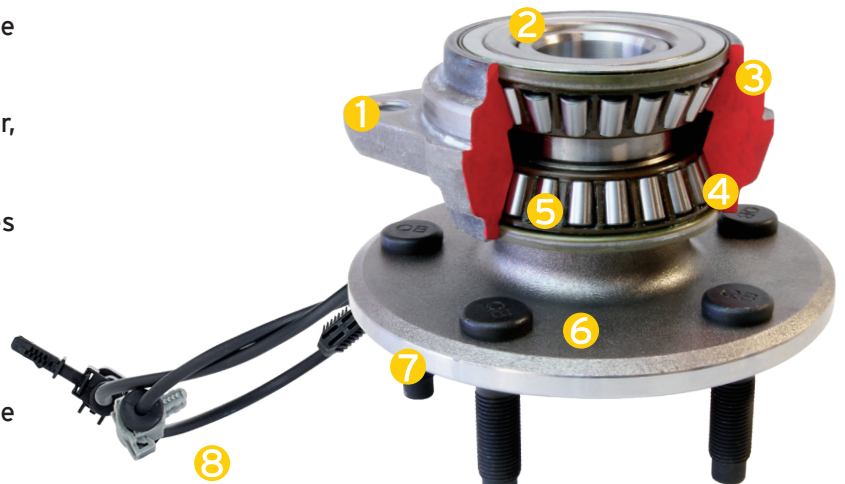

100% new OE style, corrosion-resistant coated wheel studs where required.

7. High-Carbon Precision Heat Treated Steel

Premium, high-carbon steel alloys improve load bearing capabilities and strength.

8. ABS Sensors

Application-specific ABS sensors included for perfect vehicle control system signaling.
