

QUALITY BUILT TO LAST.®

Trust Quality-Built With Every Stop.

Standard Replacement

- Dependable stopping power
- Multi-layer shims
- OE style slots and chamfers
- Precision cut backing plates for hassle-free installation
- Post cured and scorched for easy bed-in
- Copper-free 2025-compliant formulations
- Part number sequence starts with 1000 prefix

1700+ SKU's

99%+ VIO Coverage

Premium

- Application-specific friction material
- Low dust, low noise friction formulations
- Multi-layer shims
- OE design slots and chamfers
- Stainless steel hardware included as required
- Precision cut backing plates for hassle-free installation
- Post cured and scorched for easy bed-in
- Copper-free 2025 compliant formulations
- Part number sequence starts with 1001 prefix

1900+ SKU's

99%+ VIO Coverage

Ultra-Premium

- Application-specific friction material
- Enhanced friction formulations for improved performance & durability
- Ultra-low dust, low noise friction formulas
- Multi-layer shims
- OE design slots and chamfers
- OE-style stainless steel hardware where required
- Precision cut backing plates for hassle-free installation
- Post cured and scorched for easy bed-in
- Copper-free 2025 compliant formulations
- Part number sequence starts with 1003 prefix

1800+ SKU's

99%+ VIO Coverage

Heavy Duty

- Long wearing friction formulas
- Multi-layer noise abatement shims
- OE design slots and chamfers
- Low rotor wear for extended braking life
- Stainless steel hardware included where required
- Precision cut backing plates for hassle-free installation
- Post cured and scorched for easy bed-in
- Perfect for high-heat, repeat stop situations
- HD vehicles, towing, fleet vehicles, off-road applications
- Copper-free 2025 compliant formulations
- Part number sequence starts with 1002 prefix
